Buffalo

With rich wood grain, the Buffalo Chair has a distinctive appearance to match its highquality, solid-wood construction. The back is made with a special production technique pressing multiple layers of oak veneer in a compression mold, forming the characteristic buffalo horn shape that provides back and arm support.

Cubism

Made from travertine stone, Cubism is all about embracing the qualities and beauty of the material, which for centuries has been used in classical architecture around the world. The natural stone has a tactile surface with small holes and incorretions, adding a tactile quality to the geometric shape.

Cubism comes in two sizes and is suitable for many purposes, such as coffee tables, side tables, podiums to exhibiting objects.

Duke

Made of powder-coated steel, the Duke table is a multifunctional piece of furniture that comes in three different sizes. The tray top lifts easily off its base and the base can be rotated for different heights. Combining all three sizes together creates a landscape complimenting any sofa.

Right: Gear Coffee Table, Earth / Gear Side Table, Earth / Studio Sofa, Sahco Zero 0012

Gear

Gear is inspired by Brutalism Architecture from the mid-20th century. The sculptural coffee and side tables are designed as block-like structures, reflecting architectural building components of concrete.

The Gear tables come with a circular tabletop, resting on top of three cylinder shaped legs.

Ghost

Ghost is a collection of solid tables in cast aluminium. The elegant tables are casted with three pointed legs and a table top with a groove in the outline, which beautifully highlights the qualities of the material.

The tables are taken directly from the mould without polishing, which gives them a unique rough surface with texture of the mould. The raw aluminium is powder coated and afterwards handpainted, which gives it a beautiful and diverse surface, with alternation between a matte and a reflective finish.

Man

The collection references the 1950s and 1960s Danish furniture design, a period inspired by the Bauhaus era where simple and clean shapes were in focus.

Minimal detailing and stylish clean expression portray the Bauhaus design aesthetic in the Man furniture series.

New Wave

New Wave is a minimal sofa design inspired by Danish sofas from the 50's. New Wave's curvy design is reduced into three simple elements - base, back and cushion.

Each element is carefully designed according to its function only, making the New Wave a both elegant and highly refined sofa design.

Right: Nomad, Black

Nomad

Nomad Chair is a Nordic interpretation of the traditional Moroccan wicker chair. The large seat and back are made of two molded bamboo frames with inlaid natural French rattan by skilled wicker workers.

The semi-transparent French rattan gives the large surface a light expression and highlights the beautiful construction.

Right: NY11 Bar Stool, Sørensen Leather Ultra Black 41599, Dark Smoked Oak

NY11

Inspired by traditional Danish elementary school chairs, the NY11 series consists of various dining chairs, bar chairs and stools in different heights.

Just like school chairs, NY11 pieces had to be both comfortable and very durable. The result is a simple and honest design with a timeless expression.

Oku

Oku [Jpn.: Ōku] refers to the essence of the design - oak. Through experiments with the balance between lightness and heaviness - paper-thin when seen from one angle and solid from others, the material has been emphasised in a simple design.

The Oku table top is produced in oak veneer with round edges, adding a refined detail to the large surface. The legs of turned oak timber sections are positioned sporadically to create the illusion of a floating tabletop while adding sculptural detail to the table.

Right: Studio Sofa, Sahco Zero 0012 / Quartz, Chalk

Quartz

Inspired by the natural crystallic shape of the Quartz stone, Quartz changes its appearance when seen from different angles. Quartz is a versatile stone-like object, suitable as a side table, podium or sculpture. Quartz is cast in lightweight fiber concrete with a unique and tactile surface texture.

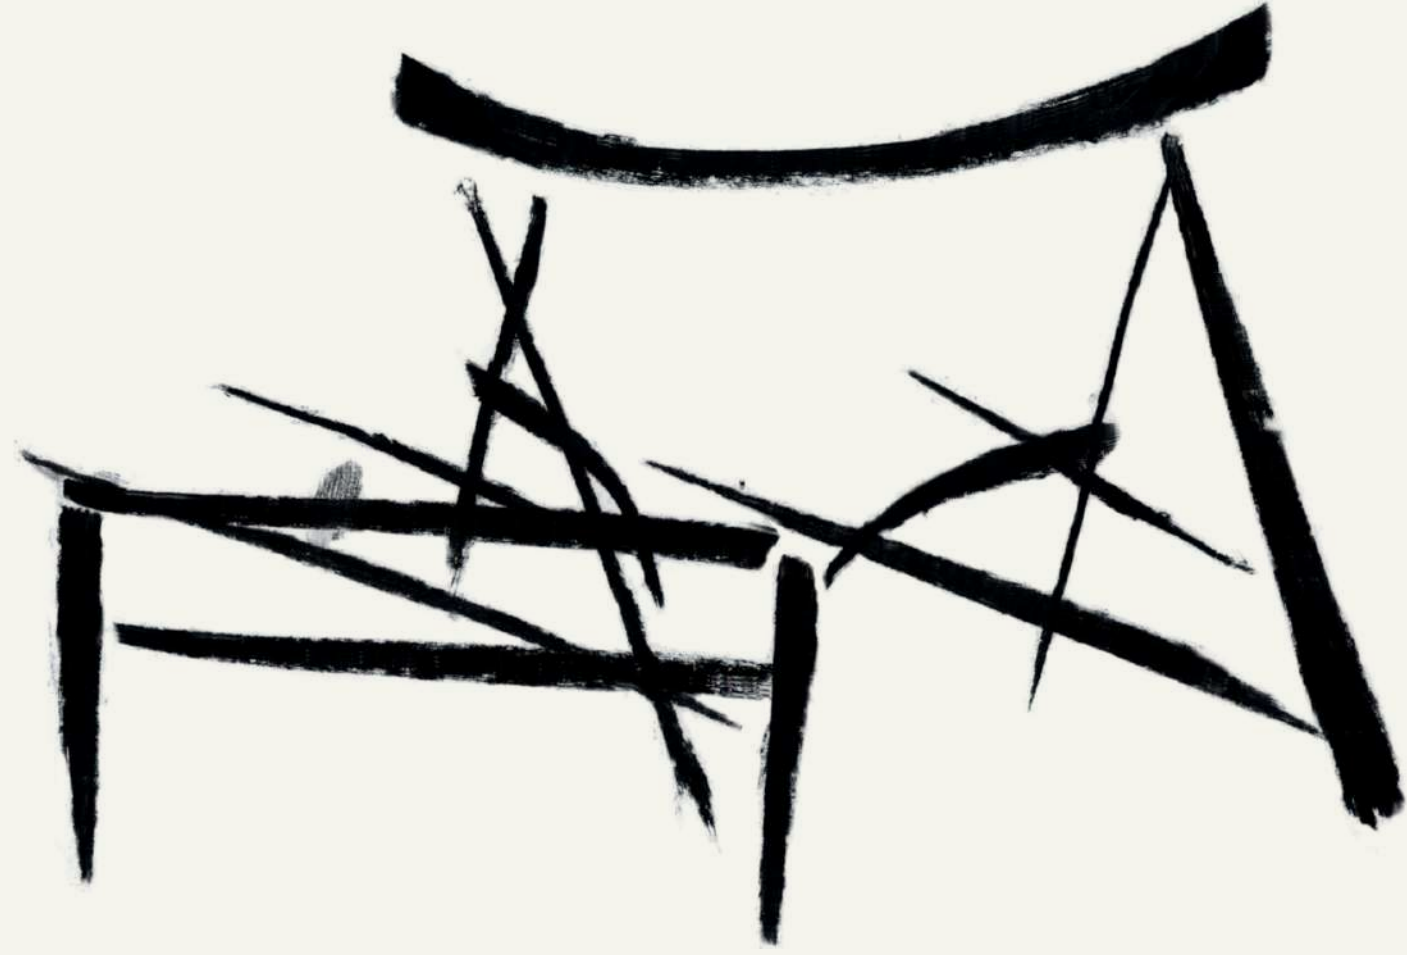

Riff

Right: Riff Sofa, Sahco Zero 0012 / Elephant Lounge Chair, Sørensen Leather Spectrum Mineral, Natural Oak / Quartz, Chalk / Ghost Coffee Table

The Riff Sofa is a study on the classic modular sofa, elaborating on the simple boxy modules. The fluted upholstery adds a certain rhythm to the minimalist sofa modules and turns the modular sofa into a refined piece of furniture.

The word Riff comes from the world of jazz music and means “to borrow and elaborate on”.

Right: Samurai, Black / Duke Small, Lacquered Obsidian Black / Studio Sofa, Sahco Moss 0015

Samurai

Samurai is a modern interpretation of the low-slung hunting chair type, with construction inspired by Japanese joint making combined with the Danish stick chairs of the 1950's. Samurai is a highly considered piece of chair making based on stick chair construction, which marry different turned oak sections that support the seating comfort and tectonic geometry.

Shanghai

The back and the armrest play a central role in the Shanghai chair's construction, giving it an iconic shape and firm support. The beauty of the ash wood is an integral part of this chair's expression, creating a piece of furniture from a simple structure and minimal detailing, uniting Asian and Scandinavian furniture design.

Right: Soho Dining Table, Travertine Stone / Hippo Chair, Barnum Bouclé Col 24, Light Smoked Oak

Soho

Rich on architectural references, the Soho collection reminisces architectural building facades to create a vertical and slim table design. The fluted surface of natural stone adds a tactile feeling, while shadows changes depth and character of the stone surface throughout the day.

Soho is made from travertine with a beautiful natural surface of small holes and incorrections. Made from travertine plates, the table is still lightweight and easy to move around.
